-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The specification fails to recite that the clamp assembly comprises at least one compressible member as called for in claim 11.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 5, 6, 8-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Hamm (US 949535).

Hamm discloses a yieldable prop having a first end and a second end (1,23) comprising a first hollow conduit (5), a second conduit (21), a clamp assembly (18,14,19,20), a ring (6,8), at least one handle (11). (Re claims 5,6), the jack interface is considered as the vertical portion of member (23). (Re claims 8,9) bearing plates (1,23). (Re claim 10), the first and second conduits overlap. (Re claim 11), member (18) is compressible.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hamm in view of Jakoubek et al. (US 2068491)

Hamm discloses the invention substantially as claimed. However, Hamm lacks a visual indicator. Jakoubek et al. teaches visual indicator (30). It would have been considered obvious to one of ordinary skill in the art to modify the Hamm to include visual indicator as taught by Jakoubek et al. to prevent overextending the second conduit.

6. Claims 14 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hamm.

Hamm discloses the invention substantially as claimed. However, Hamm is silent about the jacking means. The jacking means called for in claims 14 and 15 are old and well known in the art. It would have been considered obvious to one of ordinary skill in the art to modify Hamm to include one of the jacking means which is well known and old in the art to provide the means for extending member (21) of the Hamm reference thus adjusting the height of the prop.

***Allowable Subject Matter***

7. Claims 2-4, 7, 16-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

8. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sunil Singh whose telephone number is (703) 308-4024. The examiner can normally be reached on Monday through Friday 8:30 AM - 5:00 PM.
